BC HYDRO BUSSED “L” BOX

BCM

The BCM enclosure is designed to comply with BC Hydro distribution standards for underground wiring to main feeds. The two-piece design allows for right and left configurations with one part number. The open bottom allows easy access for BC Hydro feeder cables.

Features / Specifications

- 14-gauge galvanized steel construction
- Contains bussing and lugs
- For 3-phase underground service to 1200A
- Compliant with BCH metering standards
- Removeable bottom plate allows for left and right configurations
