WEATHERPROOF CONTINUOUS BUS SPLITTER (4 BAR)

VBG3R-4B(SA)

The VSG3R-4B continuous bus splitter is used in outdoor applications for protection from rain, sleet and snow. The bus bars are tin plated aluminum and mounted on offset steps to enable simple cable termination. The enclosures are manufactured with galvanized steel for additional corrosion protection and are finished with PC101 Grey powder coat paint.

Features/Specifications

- Galvanized steel construction
- CSA Type 3R rated
- Pour in place gasket
- 600V rated
- 4 tin plated aluminum bus bars
- 800A and above minimum 50kA bus bracing
- Double door design
- 3 Point padlockable handle
- Powder coated PC101 Grey
- Designed to City of Saskatoon specifications

Options

- Type 4 & 4X available
- Line and load lugs available
- Up to 100kA bus bracing
- 36" x 36" and 60" x 60" enclosures
- Copper bus
- Additional amperage ratings
- Custom sizes, material and colour available

**Contact factory for additional options if required.
