

## Advanced Technology. Simple Solutions.

## **ELECTRIC VEHICLE CHARGE KIOSK**

### **VCKA**

This family of electric vehicle charge kiosks are ideally suited for applications in which chargers and cables need to be protected from environment conditions or from vandalism. In addition to providing protection, these kiosks are convenient access points for up to 3 individual charge stations.

#### Features / Specifications

- Marine-grade aluminum construction
- · CSA Type 3R rated
- · Pad-mount design
- Slanted roof with rain gutter
- · Padlockable stainless steel 3-point handle
- · Hinged doors with pour-in-place gasket
- · Hidden hinges for additional security
- · Gas shock door stays
- Bottom access for charge stations, allowing exterior doors to be closed when charger is active
- Powder coated PC101 Grey
- Interior panels powder coated PC107 White

#### **Options**

- Additional amperages and chargers
- · Stainless steel construction
- Custom powder coat colours
