

Auxiliary Compressor Kits

Valid's on-board Air Compressor System offers advanced features including intelligent pressure output selection and multi-level pressure output options.

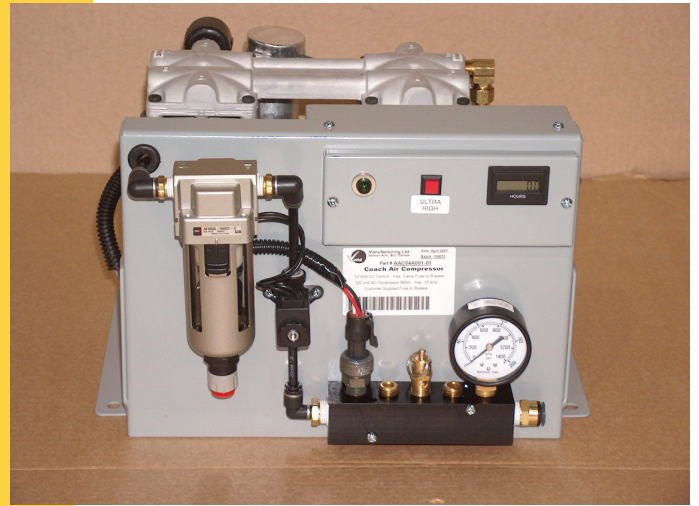

Advanced Technology. Simple Solutions.

1-888-632-6477 sales@validmfg.com validmfg.com

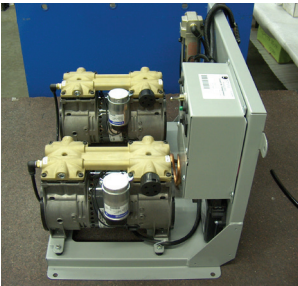

FEATURES

- Automatic system controls
- Available in single and dual configuration with two demand settings
- Intuitive troubleshooting: integrated mechanical pneumatic and diagnostic tools
- Maintenance friendly: oil-less system with automatically drained mist filter that conditions output air
- Dual configurations ensure an uninterrupted air supply
- Small footprint

HIGHLIGHTS

- User friendly controls
- Intuitive service & troubleshooting features
- Space-saving design

SPECIFICATIONS

- 90–120 psi—Standard air pressure settings
- 120–130 psi—High demand air pressure settings (Leveling)
- 130–135 psi—Ultra-high demand air pressure settings (Tire Inflation)
- 150 PSI—Pressure relief setting
- 1.3 CFM—Output @ 120psi
- 2.6 CFM—Output @ 120psi w/ 20amp circuit on dual compressor model
- 120VAC—Electrical requirement
- 15 AMP—Electrical circuit requirement
- 1.5 AMP at 12VDC—Electrical output settings
