STRATEGIC PARTNERS

Valid forged a strategic partnership with Spartan RV Chassis to further refine Valid's Trueline Leveling System.

The combined expertise of Valid and Spartan RV Chassis has created a superior vehicle-leveling product designed specifically for luxury RV drivers and passengers.

▲ Accelerometers along 3 separate axes of the vehicle chassis provide feedback to level the coach and protect the vehicle from twisting.

“ Valid has been very responsive while working with Spartan. The open communication ensures that both teams are on the same page while working together to make Spartan products the best-in-class.

Jeff Wertz | Spartan RV Chassis

LEVELING SYSTEM FEATURES

- Leading-edge technology provides one-step, stress-free air leveling.
- Automatic protection against damaging chassis twist.
- Manual mode allows adjustment of individual spring heights during low speed travel.
- Quick and easy leveling without the need for jacks.
- Built in monitoring functionality automatically calculates and makes adjustments for a smooth, comfortable ride.

“ Spartan RV Chassis is an excellent company to work with. Over the years we have developed many new products which would not have been possible without the combined knowledge and expertise from both sides.
