

Valid™ Trueline Leveling System

The Valid™ Trueline Leveling System is an industry-proven, one-step system for air-leveling vehicles.

Now available for aftermarket installation exclusively through Spartan RV Chassis.

www.validmfg.com

FEATURES

- Leading-edge technology provides one-touch, stress-free air leveling
- Automatic protection against damaging chassis twist
- Manual mode allows you to adjust the height of each air spring which can be used while traveling at low speeds
- Quick and easy leveling, without the need for jacks
- Simplicity of one-touch leveling
- Monitoring functionality calculates and makes adjustments so you don't have to

▲ Accelerometers along 3 separate axes of the vehicle chassis provide feedback to level your coach and protect the vehicle from twisting.

USER INTERFACE

- Intuitive touchscreen for easy control and selection of leveling mode
- Three digital “bubble level” indicators show exact vehicle position
- User-friendly touchscreen allows for easy leveling mode selection, as well as four-point manual control of all leveling actuators
- Clear visual feedback on vehicle status is provided

INQUIRIES
